EARLY CAREER

TECHNICAL

SHOWCASE

A one-day event for Early Career Researchers

The Alzheimer's Research UK London Network Centre would like to invite Early Career Researchers to a day of exciting talks showcasing the array of techniques you and your peers use in the lab.

Talks are short format to allow as many ECRs to share what they do.

The event includes speakers from ARUK highlighting funding and other opportunities most relevant to ECRs and plenary speakers from the London Universities.

A final list of talks and speakers will be confirmed shortly.

Please sign up at the following link:
