

Have you had a dementia diagnosis? Do you want to shape solutions to reducing barriers in dementia diagnosis and care?

We are looking for members of the public who have had a dementia diagnosis to join our public consultation group and/or join our core members team.

Who are we?

EquaDem Network Plus is a new 5-year UK-wide network to find solutions to barriers to accessing dementia diagnosis and care.

What would you be doing?

- Joining a group of researchers, charities, social care and NHS workers who are working together to improve the future of dementia diagnosis and care.
- Sharing your experiences of diagnosis and support, and your ideas on how they could be improved.
- Attending core members meetings 2-4 times per year.
- Attending conferences and workshops face-to face and on-line.

How would we support you?

- If you joined our group, you would only need to commit to attending 2 meetings per year and only for as long as you felt able.
- You would not be alone as we are looking for at least two members of the public to join our team.
- We would arrange travel to events and ensure you were supported throughout all meetings and events.
- You would be allowed to bring someone close to you for support.
- Whether face-to-face or on-line you would have someone to support you.

Scan the QR code for more information about our core members and who's involved.
